(1) Moncef Slaoui was born on July 22, 1959 in Agadir, Morocco. His father worked in the irrigation business. Years after, he died when Moncef was a teenager. So, the mother was left alone to raise him and his four siblings.

(2) Slaoui graduated from Mohammed V High School in Casablanca. In 1976, Slaoui left Morocco at the age of 17 to study medicine in France but missed the registration deadline due to new registration procedures and his mother being ill. He enrolled at the Free University of Brussels, where he received a BS in biology and then a MS. During this time he was very politically active. In 1983, Slaoui earned a PhD in molecular biology and immunology from the Free University of Brussels.

(3) Slaoui took postgraduate courses at Harvard Medical School and the Tufts University School of Medicine, although he did not complete his studies at either school due to work commitments. In 1998, he received an accelerated MBA from the International Institute for Management Development (IMD) in Lausanne, Switzerland.

(4) In 1988, after consulting SmithKline-RIT for three years, Slaoui joined the company as a vaccine researcher. In 2006, he was appointed head of research and development at GlaxoSmithKline. Slaoui spent thirty years working at GSK. During his time there, Slaoui oversaw the development of numerous vaccines, including Cervarix to prevent cervical cancer, Rotarix to prevent gastroenteritis in children, and an Ebola vaccine. He also spent 27 years researching on a malaria vaccine, Mosquirix, that was approved by the European Medicines Agency in 2015 and touted as the first in the world. In 2016, he discussed GSK's development of bioelectronic medicine. Slaoui left GSK on June 30, 2017. In September 2017, he joined European venture capital firm Medicxi.

(5) On May 15, 2020, President Donald Trump officially announced Operation Warp Speed, a project to develop and deliver 300 million doses of a vaccine for the coronavirus disease 2019 by January 2021. Operation Warp Speed was managed by White House senior adviser Jared Kushner with the support of the United States Department of Defense and the United States Department of Health and Human Services.

(6) President Trump described Slaoui as "one of the most respected men in the world in the production and, really, on the formulation of vaccines", while Secretary of Health and Human Services Alex Azar praised him as "arguably the world's most experienced and successful vaccine developer".

III. WRITING (10 POINTS)

Task one (4pts)

To be a successful person in the future, one should

Task two (6pts)

FREE FIRE and PUBG are causing a lot of harm to students and even children. Most of them are seriously addicted. Teachers and parents consider these games as enemies.

Write a letter to the editor to suggest ways that can help children and youngsters to avoid being addicted to computer or phone games. Give reasons and examples to support your point of view.

Dear Editor,

DO NOT WRITE YOUR NAME OR SIGN THE LETTER.
